

OUR OBJECTIVES & ACTIVITIES

OFFERING FREE THERAPY

We provide therapeutic craft workshops in the UK for adults with disabilities and/or learning differences. These are fun and caring environments, in which to learn new craft skills, gain confidence, improve motor skills, socialise, and work together as a team.

PROVIDING EMPLOYMENT

We train skilled design volunteers to work with faith-based organisations in the developing world to set up employment-generating craft workshops for people with disabilities, who would otherwise be living in poverty and isolation.

CHANGING COMMUNITIES

Through all of our activities, we enable and empower people with disabilities to contribute to their community, thus combating the false assumptions and stigma associated with disability, and transforming attitudes towards people with disabilities in the UK and overseas.
