

OUR OBJECTIVES & ACTIVITIES

SKILLS, THERAPY & SOCIAL INCLUSION

We provide therapeutic craft workshops in the UK for adults with disabilities and/or learning differences. These are fun and caring environments, in which to learn new craft skills, gain confidence, improve motor skills, socialise, and work together as a team.

PROVIDING TRAINING & EMPLOYMENT

We train skilled design volunteers to set up employment-generating craft workshops in the developing world for people with disabilities, who would otherwise be living in poverty and isolation.

CHANGING COMMUNITIES

Through all of our activities, we enable and empower people with disabilities to contribute to their community, thus combating the false assumptions and stigma associated with disability, and transforming attitudes towards people with disabilities in the UK and overseas.
